Big things come in small packages

Explore what USP has to offer within the wider NUS

The University Scholars Programme (USP) is a small group of undergraduates from different faculties in Singapore’s flagship university, the National University of Singapore (NUS). NUS is a big place with boundless opportunities and lots of room for exploration. It is truly a wondrous place to be.

Imagine immersing yourself in a close-knit community within the wider NUS – joining an intimate group of open-minded individuals who share a passion to do amazing things, who celebrate diversity of ideas, and who are always curious about learning and exploring interconnections. These individuals encourage one another to present different opinions and perspectives on just about anything, inside and outside the classroom. USP is that community.

At USP, we welcome about 200 undergraduates each year, providing them with an integrated academic and residential college environment within the NUS University Town. Being small means that every voice is heard, every interaction is meaningful, learning is active and rigorous, and pursuit of ideas is endless.

Our students initiate and do numerous things locally and overseas from their first year to their fourth year. They are excited about the interweaving of ideas, and in this excitement, they are strongly supported by professors, staff and alumni.

We are small, but our aim is big – to shape students to become independent, broad and adaptable thinkers and doers, who will make an impact in the world.

At USP, we welcome about 200 undergraduates each year, providing them with an integrated academic and residential college environment within the NUS University Town. Being small means that every voice is heard, every interaction is meaningful, learning is active and rigorous, and pursuit of ideas is endless.

Our students initiate and do numerous things locally and overseas from their first year to their fourth year. They are excited about the interweaving of ideas, and in this excitement, they are strongly supported by professors, staff and alumni.

We are small, but our aim is big – to shape students to become independent, broad and adaptable thinkers and doers, who will make an impact in the world.
Joining USP means joining a community that is curious, critical, courageous and engaged.

Find out about our innovative curriculum, diverse global opportunities, and transformative learning environment in the following pages.

Go to usp.sg for more details and updates of exciting programmes and developments in our community.

---

We are adventurous in thought. We pursue a broad range of intellectual interests and are ready to make connections across different domains.

We are willing to consider differing points of view, unafraid to face challenges and to act upon ideas.

We extend the frontiers of knowledge in energetic and creative ways, and are prepared to navigate and help shape a complex world in a responsible way.

We are intellectually rigorous, deeply reflective and value a humility born of awareness of the limitations of our own knowledge.

USP Curriculum

We offer a broad-based curriculum that balances both breadth and depth to give students an interdisciplinary education. Interdisciplinary means more than simply taking modules in different areas of study; an interdisciplinary education fundamentally changes how we perceive, think about, and understand the world. By examining a subject with knowledge and methods from multiple disciplines, such an approach produces new possibilities for innovation and creation.

Students admitted to USP are concurrently enrolled in 1 of 7 NUS faculties or schools:

- Faculty of Arts and Social Sciences
- Faculty of Engineering
- Faculty of Law
- Faculty of Science
- NUS Business School
- School of Computing
- School of Design and Environment

The average student to faculty ratio in the USP classroom is 15:1

Learning in USP takes place in small classes that rely on strong interpersonal interaction and vigorous discussions. In this environment, all students are encouraged to share their perspectives and thoughts, and to learn through questioning their own assumptions and exposing themselves to new and competing ideas.

My major and USP: 70% + 30%

USP students earn 70% of their academic credits in their home faculty, and 30% in USP. The total workload is the same as that of other NUS undergraduates.
A USP student reads 12 USP modules in four years, and these modules are taken in three structured tiers, namely Foundation Tier, Inquiry Tier, and Reflection Tier. Each USP module is carefully designed to be truly interdisciplinary. Classes in USP are small and intimate, and our students get to choose from a wide range of modules.

### Foundation Tier
- Writing and Critical Thinking
- Apocalyptic Cultures
- Civic Discourse in a Fractured World
- Clothing Identity
- Colonialism and Cosmopolitanism
- Conditions of Happiness

Focus on further developing and expanding the skills and ideas that students encountered in the Foundation modules. Encourage students to generate new and innovative ways to look deeply at complex issues and solve problems.

### Inquiry Tier
- Humanities and Social Sciences
- Arts of Memory: Public Recollection & Memory
- Engaging and Building Communities
- Ethics and the Environment
- From Lab to Stage: Writing the Science Play
- Language, Cognition and Culture
- Managing Cultural Difference: Theorising the 5%ile Model
- Multiculturalism in Singapore and its Contested Meanings
- Nationalism and the Arts
- Representing War
- Singapore: The Making of a Nation
- Singaporean Nostalgia
- The Heterogeneous Indians of Contemporary Singapore
- The Problematic Concept of “Casted”
- Theatre and the World
- Transitional Justice and War Crime Trials: Case Studies from Singapore and Asia
- Welcome to the Anthropocene: Agency in the Era of Climate Change

Builds upon both the broadening of inquiry, and the deepening of knowledge that students have gained within their own majors by having students reflect on these processes in a single seminar-style module.

### Reflection Tier
- Intellectual Responsibility in a Complex World
- Human Trafficking and Modern Slavery
- Issues in Anti-Drum Justice
- Multidisciplinary Perspectives on "Mini"
- Narrative in Everyday Life
- Technologies of Home

Nurture a solid series of skills that will equip students for the interdisciplinary work they will encounter in the subsequent tiers.

A student must do at least 1, but no more than 3 Independent Study Modules (ISMs).
Foundation Tier

The first tier consists of three Foundation modules that emphasise critical thinking, close reading and engagement with texts, quantitative reasoning, and a contextual understanding of the major ideas and questions in the Arts and the Sciences. The goal of Foundation modules is to encourage students to challenge assumptions and ask critical questions across disciplines.

The three Foundation modules are conceptualised by dedicated USP professors, as follows:

Writing and Critical Thinking

This helps students to read and think critically, to engage with texts rather than simply repeating them, and to write persuasively. Each module is organised around a series of fascinating questions that students will investigate from a variety of disciplinary perspectives.

Quantitative Reasoning Foundation

Students gain an appreciation that, for many questions or issues, a quantitative analysis can provide the insight and clarity that complement and go beyond what might be gained through a qualitative approach.

University Scholars Seminar

Spanning two semesters, students learn to situate the major ideas, thinkers and paradigm shifts in the history of intellectual inquiry. We survey the different attempts at addressing key questions in the pursuit of intellectual thought.

An example of a Foundation module

What do popular expressions of the apocalypse tell us about who we are, what we fear, and how we choose to consume culture?

Apocalyptic themes dominate contemporary expressions of popular culture, revealing highly imaginative and frightful ways that the end of the world might come about as well as the many scenarios of the life beyond. But our fascination with these themes tell us that they are influential not because they are works of fiction but they have something important to say about our political and social realities. How then do apocalyptic cultures mirror changing historical anxieties over the different agents of destruction and the people who have access to them? What do they reveal about consumers especially in a transnational context? For example, how does apocalyptic cinema from the US become transplanted in a place like Singapore?

Through looking at the themes and objectives of apocalyptic cultures, the teaching professor for this module aims to achieve the larger purpose of fostering intellectual consciousness among students so that they can ask important and significant questions, construct responses to those questions, and ultimately express them in the written form.
Inquiry Tier

The second tier consists of eight Inquiry modules in either the Humanities and Social Sciences domain or the Sciences and Technologies domain. Students will read modules distributed evenly between the two domains, for a broad intellectual and disciplinary base. The overall goal of the second tier is to deepen students’ understanding of intellectual connections outside of their disciplinary specialisations by way of multidisciplinary inquiry. To create an environment of educational intimacy and collaborative discovery, Inquiry modules take place in small seminars to facilitate meaningful dialogue.

The Humanities and Social Sciences domain covers Literary Studies, Visual and Performing Arts, Philosophical Inquiries, Human Behaviour, Society, Economy and Polity, and Civilisational Studies.

The Sciences and Technologies domain covers Life Sciences, Nature’s Laws, Quantitative Reasoning, Biological and Medical Technologies, Physical and Chemical Technologies, and Information Technologies.

Examples of Inquiry modules

**In the Humanities and Social Sciences domain**

- **UCV2209** The Heterogeneous Indians of Contemporary Singapore

  This module provides for a multifaceted understanding of the heterogeneous Indian community in contemporary Singapore. The reality and elasticity of an Indian cultural mosaic, which is influenced and exemplified by colonial and post-colonial history, migrating patterns, geographical proximity to India, Singapore-India foreign relations, centrality of religion, localised food culture, diverse traditions and rituals, differing languages, variety of occupations, and myriad of organisations and networks, underpins and personifies the essence of multicultural identity in Singapore. The teaching professor will combine theory and empirics in studying and discussing these various issues. Field trips, sampling of food alongside the observance of rituals, and dialogues with policymakers and stakeholders are the principal highlights of this module.

- **UBM2201** Hormesis and Life

  “What doesn’t kill you makes you stronger”, is a popularised saying that instills optimism and courage. But is there any scientific basis that undergird this principle? And if so, how far can we push this idea?

  “Hormesis” is the scientific term that captures the essence of these rhetorics. This module characterises hormesis and addresses the biological mechanisms behind it using classical examples of stresses that are capable of evoking both a good and a bad response. For example, why does mechanical stress break a bone and strengthen another? Why does a bug infect one individual but immunise another? Based on this exposition of the concept, the teaching professor hopes to generate a platform for an intellectual discourse and deep dialogue on the potential analogies across domains even as far-flung as sociology and psychology. Ultimately, he aims to create a new perspective to stress, and to challenge students to consider the merits of managing stress rather than avoiding it.

**In the Sciences and Technologies domain**

- UCM2202 The Heterogeneous Indians of Contemporary Singapore

Examples of Inquiry modules in the Sciences and Technologies domain

- **UCM2202** The Heterogeneous Indians of Contemporary Singapore

Ultimately, he aims to create a new perspective to stress, and to challenge students to consider the merits of managing stress rather than avoiding it.
Reflection Tier

This third tier consists of a single module, the Senior Seminar. It is designed to bring students together towards the end of their degree to reflect on the conditions of their own disciplinary knowledge and the assumptions developed in disciplinary training, and to cultivate a broader interdisciplinary framework to approach discourse and ideas with.

This module prepares students for intellectual life beyond the university by asking them to reflect on how their undergraduate education can be brought to bear on the complex political, social, economic, and existential problems of the “wider world” they will be confronting and participating in upon graduation. As a capstone of the USP education, this module builds on the entirety of USP’s curricular and co-curricular experiences by getting students to consciously make connections among these experiences.

Whether these connections are across disciplines, learning activities, or academic and broader social concerns, the aim is for students to draw new and deeper insights into what they have learnt at university and how they can continue to do so beyond the training ground of the university.

Reflection Module

USR4002A
Intellectual Responsibility in a Complex World

This module prepares students for intellectual life beyond the university by asking them to reflect on how their undergraduate education can be brought to bear on the complex political, social, economic, and existential problems of the “wider world” they will be confronting and participating in upon graduation. As a capstone of the USP education, this module builds on the entirety of USP’s curricular and co-curricular experiences by getting students to consciously make connections among these experiences.

Whether these connections are across disciplines, learning activities, or academic and broader social concerns, the aim is for students to draw new and deeper insights into what they have learnt at university and how they can continue to do so beyond the training ground of the university.
USP International Programmes are designed to give students the opportunity to explore interdisciplinary modes of thinking and understanding beyond the conventional classroom setting in Singapore, and relate and translate their learning to the wider world. From their first year in USP, students are encouraged to become active participants in this experience, whether by proposing and organising international programmes, or by demonstrating leadership skills and resourcefulness throughout.

In doing so, we hope to foster an environment wherein students, with support from professors and administrative staff, initiate and take ownership of endeavours for their personal and professional development.

- **USP Student Exchange Programmes (SEP)**
- Joint Degree Programmes,
- Double Degree Programmes
- Short-Term Programmes:
  - Study Programmes,
  - Conferences,
  - Module Study Trips
Joint Degree Programmes, Double Degree Programmes

Joint Degree Programmes
• NUS-Australian National University, Australia

Double Degree Programmes
• NUS-Sciences Po, France
• NUS-Waseda University, Japan

Short-Term Programmes
Study Programmes
• Buddhism-in-Asia, various countries
• Builders Connect, Philippines
• Civilisation of Iran, Iran
• Comparative Cultural Rhetoric Academy, France
• Forgotten Communities, Malaysia
• Inter-Civilisational Dialogue, Turkey
• Internship Exchange with SP Jain Institute of Management & Research, India
• Study Trip for Engagement and Enrichment (STEER), various countries
• U21 Social Entrepreneur Corps, Ecuador

Conferences
• Asian Undergraduate Summit, various countries
• AUN and ASEAN+3 Education Forum & Young Speakers’ Contest, various countries
• ‘Desert Nights, Rising Stars’ Writers Conference, USA
• Global Next Leaders Forum, Japan
• Pan-Asian Student Forum, various countries (Seoul, Beijing, Hong Kong, Tokyo)
• Promotion Diplomatic Invitation, USA
• TASP University ERSE International Symposium, USA

Module Study Trips
• Participating Social Development in Southeast Asia, Thailand
• State-Minister Relations in Southeast Asia, Laos and Thailand
• Theatre and the World, Indonesia

USP Student Exchange Programmes (SEP)

Europe
• Free University of Berlin, Berlin
• Jagiellonian University, Krakow
• Sciences Po, France
• University of Amsterdam, Amsterdam
• University of Kent, Canterbury
• University of Birmingham, Birmingham
• Uppsala University, Uppsala

Asia and Middle East
• Bilkent University, Ankara
• Bogazici University, Istanbul
• Chinese University of Hong Kong, Hong Kong
• Nanjing University
• Peking University, Beijing
• University of Delhi, Delhi
• Leiden University and Lady Shri Ram College for Women

Americas
• Arizona State University, Arizona
• Carleton College, Minneapila
• Pennsylvania State University, Pennsylvania
• University of Arizona, Arizona
• University of Connecticut, Connecticut
• University of North Carolina at Chapel Hill, North Carolina
• University of Oregon, Oregon
• Yale University, Connecticut

Module Study Trip
• Visiting International Student Program

Over 40 different international programmes in over 20 countries

More than 85% of USP students go on various international programmes

Only first in NUS to partner with:
• Lady Shri Ram College and Hindu College, India
• University of Tehran, Iran
• Bogazici University, Turkey

International Programmes
Asian Undergraduate Summit

“USP’s student-centric culture has empowered me to head projects like the Asian Undergraduate Summit. Being the Chairperson of this regional venture has imparted invaluable skills such as effective communication, team coordination and stakeholder management just to name a few. The lessons learnt from this project go well beyond my classroom, equipping me for life after university.”

Raag Sudha Sanjay
Political Science + USP

The Asian Undergraduate Summit is a student-led, student-run international conference. The Summit aims to bring together undergraduates of diverse disciplines from Asia, and provide them with the opportunity to engage in meaningful academic, cultural and social exchange.

Forgotten Communities

“It’s a challenge to interact with the local people given the language barrier. I had to get out of my comfort zone and be very open to new ideas and beliefs, feelings, and emotions. It’s amazing how quickly we bonded with everyone, including the UTAR students and staff.”

S Sivapriya
History + USP

This is a student-planned field trip to study “New Villages” in Malaysia. Students engage in ethnographic research and contribute to mapping the community assets of these rural “New Villages”. Students get to do fieldwork with lecturers and students from Universiti Tunku Abdul Rahman (UTAR), guided by USP professors.

Builders Connect

“Learning first hand from the management team as well as the individuals who benefit from these NGOs made learning more interactive and applicable to daily life.”

Tan Jing Yi
Mechanical Engineering + USP

This is a development-work learning programme to the Philippines. Initiated by USP students, it aims to achieve learning and service through development work research and fieldwork. Students partner with, and study the works of International Charity Organisations (ICOs) or Non-Governmental Organisations (NGOs). Driven by their passion, students gain multidisciplinary insights into the complex challenges of poverty alleviation, talent synergy, social entrepreneurship, global hunger, child education, and environmental sustainability. Some have progressed to interning or working at the ICOs and NGOs.

Student Exchange Programmes

“My stint in Turkey has made me appreciate and embrace cultures I’d never ever imagined being immersed in. Through my exchange at Boğaziçi University, I found genuine empathy, and openness for people as people.”

Khng Lanyuan Desiree
English Literature + USP

USP students are strongly encouraged to participate in Student Exchange Programmes (SEPs) which enrich their learning experiences in a different educational, social and cultural environment. Students explore different perspectives and alternative approaches to learn the subjects they study, experience new cultures and different ways of living, meet friends from around the world, and travel to different places. By stepping out of Singapore, they can enhance their intellectual, leadership and personal potential in exciting and unpredictable ways.

Joint Degree Programmes with the ANU

“People at the ANU are really easy to work with and you can call your professors by their first name. Everyone was so welcoming. It’s how willing one is to ask questions and propose ideas.”

Matthias Wong Meng Yan
History + USP

USP offers joint degree programmes (JDPs) with the Australian National University (ANU) – one for USP students in the Faculty of Science, and the other for those in the Faculty of Arts and Social Sciences. USP students spend three semesters in the ANU, take five courses from the Faculty of Arts and Social Sciences, and then return to USP to complete the remaining courses in their chosen degree. ANU students visit Singapore and also gain research experience in the fields of their choice. The research culture at the ANU is complemented by USP’s curriculum, which encourages exploration outside one’s major into interdisciplinary dimensions. Students learn in an open exchange environment, USP hosts ANU students when they are in NUS.
College and Community

Cinnamon College (USP) is no ordinary campus residence. It is where USP students forge exciting possibilities and create precious memories.

Our college is located in NUS University Town. Within this unique space, students develop a sense of belonging through living and learning together, making full use of the facilities and resources. They take classes at the learn labs adjacent to the college block, they share meals with peers, professors and alumni, they participate in sports and hold events in the hall, and they have numerous thoughtful discussions, both formal and informal, in the Master’s Commons, floor lounges, suites and our common lounge – fondly known as Chatterbox.

"When I think USP, I think Home. It’s hard to pinpoint what makes me gravitate towards USP, but perhaps it’s the warmth of the community that lies at the heart of USP. That treasure trove of warm memories that we share in Cinnamon College, the late night study sessions, the mind-blowing Avalon games, the heart to heart talks through the night, the impassioned intellectual discussions and that occasional surprise gift at our door. If NUS is the body of my University life, USP is my heart and soul."

Jeremy Jee (Computer Science + USP)
Our community is close-knit, socially engaged, highly intellectual and a lot of fun!

We are a community of students, professors, staff and alumni of diverse backgrounds, disciplines and interests. Our students also belong to and are represented by the University Scholars Club (USC), representing the student community in academic and social welfare matters. USC actively seeks to empower students to lead impactful projects and stimulate critical discussions in the community.

Both residential and non-residential students initiate and participate in an extensive range of intellectual, community engagement, and social programmes and projects.

**Brainfood+**
A not-for-credit chance to learn, Brainfood+ provides a fun dimension for students to explore beyond formal learning interests. Led by volunteer USP professors, small groups of students meet weekly to tackle a central question, using a book to drive inquiry forward.

**USPolymath**
USPolymath is a student interest group that invites speakers to share compelling ideas with the wider USP community using the Pecha Kucha format – 20 slides for 20 seconds each. Previous sessions have spanned a wide range of topics that reflect the diverse disciplines and interests in USP, from the principles of gravity to the defense of feminism in Singapore.

**The Sessions**
The Sessions ignites student-led discussions within and beyond the USP community by serving as a platform to host interesting guests who enrich conversations on various topics. Students select topics and guests based on community suggestions and plan for a range of discussion formats beyond conventional dialogues.

**USP Productions**
Active since 2006, USP Productions is a platform for students to showcase their theatrical talents and skills in annual productions. Committed to the development and production of quality student-driven theatre, USP Productions explores issues deeply relevant to Singaporean society at large.

**Connect Tuition**
A pro-bono mentoring and tuition programme initiated in 2014, Connect Tuition pairs more than 140 USP students with underprivileged children aged 8 to 16 years living in the Casa Clementi and Dover housing estates. With a mission to foster community ties, support positive youth development and provide conducive learning environments for the mentees, more than 200 children have benefitted.

**We Will Dance**
We Will Dance is Singapore’s first 10-hour charity dance marathon that was organised in 2013 by USP alumni. To date, USP students have attracted over 1,000 participants and raised over $500,000 for charitable institutions focused on education. We Will Dance brings together its beneficiaries to groove with its participants to the beats of K-pop, zumba and hip hop.
Adjusting to a new environment in university can be daunting. Different parts of the USP community come together to support each other through this transition and across the undergraduate experience.

From formal advising avenues to ground-up initiatives, help is always available in USP – empowering everyone to have the best experience they can.

Academic Support
Senior USP students act as Peer Mentors, providing personalised academic guidance to freshmen. Freshmen are also assigned professors as Academic Advisors.
At the Writing and Quantitative Reasoning Centres, experienced senior students assist their peers with their assignments.

Social and Psychological Support
USP students belong to one of six Houses, which act as welfare and support networks connecting them across batches.
First-line Counselling Care and Support is available to all USP students.

Student Interest Groups
- Love, USP advocates for mental health awareness within the USP community
- Gender Collective is an inclusive and safe space to discuss issues relating to privilege and marginalised groups

Financial Support
Bursaries and Grants
- UTown Bursaries and USP Grants help financially challenged students defray the cost of staying in our college

Scholarships
- UTown Scholarships and USP Scholarships are available for outstanding students
I enrolled in NUS with the intention of learning what it takes to earn my keep in Science (bread and butter), but got so much more in the process. USP offered “teasers” from other faculties and disciplines which included modules on writing, business, civilisation, engineering, chemistry and physics. I will always remember how we deconstructed consumerism and constructed gadgets in the classes. As a science student, I had the chance to build a Tesla coil (unsuccessfully and shorted the circuit to the engineering lab!). USP allowed for interaction with students from other faculties – it increased my exposure to ideas as people have different ways of solving the same problem. These experiences shaped my love for learning.

I learnt through USP the many skills that complement research; this helps a lot in my current work on breast cancer. Suffice it to say, I would be a different person if not for my time at NUS and USP.

Dr Li Jingmei
Life Sciences + USP, Class of 2006
Senior Research Scientist at the Genome Institute of Singapore, A*STAR

My experience in USP is akin to taking intellectual dips in various pools of knowledge – from the logic underlying mathematics to the history of Islam across societies somehow helped my mind instinctively see issues or problems from different angles, and be comfortable to read across disciplines in order to solve problems. For example, in Chapter W, the problem that we are trying to solve is not just the problem that villages have no light. This issue is intricately tied with the issue of rural supply chain, engineering quality of products, the gender dimension in poverty, the role of economic incentives in our programmes, and the formal and informal structures of power in rural societies.

Fairoz was honoured with the prestigious NUS Outstanding Young Alumni Award 2017 for his outstanding achievements and leadership in community service. He founded Chapter W, a non-profit social enterprise that provides innovative, suitable and sustainable solutions to help and empower the poor in Indonesia. Currently, he is pursuing a Master of Public Policy at Blavatnik School of Government, University of Oxford on a Chevening-Oxford scholarship.

Mohamed Fairoz Bin Ahmad
Sociology + USP, Class of 2006
Founder and Executive Director, Chapter W

I am from the pioneer batch of Law + USP students. My USP experience has greatly enhanced my work and function as a lawyer. Learning how to engage in conversation and listen successfully through years of discussions in various forums in USP (online, in classes, in lifts or the college dining hall) has shaped key interactions with my colleagues and my clients. Part of being a lawyer being able to advise on how best to proceed taking in client’s interests, understanding these interests and getting clients to understand the way forward has been challenging but manageable thanks to my USP experience.

What’s also important to me is that the rich support system and community at USP meant I could have my friends in USP and the constant emotional support and intellectual refining have continued beyond my undergraduate days.

Apart from reading Law and being a part of USP, I was also active with the NUS Jazz Band and sang at gigs as a freelancer. Time management is really important. You can make the most of limited time by knowing what is important to you and what to spend it on.

Tong Miin
Law + USP, Class of 2016
Legal Associate, Lee & Lee

We value our alumni tremendously. They do wonderful things in varied fields and sectors, and continue to do things with USP. They return to mentor students, help interview applicants to USP, share their experiences of life after university, and collaborate with students on special projects. They tell us that they do so because of their USP experience. Read the USP experience of seven alumni here, and learn more about other alumni at usp.sg.

Alumni
We value our alumni tremendously. They do wonderful things in varied fields and sectors, and continue to do things with USP. They return to mentor students, help interview applicants to USP, share their experiences of life after university, and collaborate with students on special projects. They tell us that they do so because of their USP experience.
One of the things that USP prides itself on is the quality and rigour of its curriculum. I experienced this early in Year 1, when I read a module “Democratic Possibilities in Singapore”. The various teaching methods employed – including conducting a two-hour long seminar on our own – really challenged my friends and I to think about the possibilities of Singapore’s future. In addition, USP is made up of a very diverse group of students. This group of friends helped me develop an open mind to accepting different views in the world, but without having to compromise on my own views.

Curiosity is highly prized and valued in USP. Many people have the perception that work in the civil service is dull, or stagnant, but I find that it is a matter of perspective. The positivity which USP has taught me to view things – especially problems – in the world has made working life a lot more fun and meaningful.

Song Xiuhua Shafiqah Nadiah Binte Ismail
English Literature + USP, Class of 2010
Senior Manager, Communications Group (Prime Minister’s Office)

My journey through USP taught me to assimilate large amounts of information across diverse subjects effectively and to draw connections between different disciplines that may not be obvious elsewhere. While Business was my main course of study, through USP, I was able to focus on a great number of engineering, aerospace and life sciences courses.

Cross-disciplinary training between business and engineering has enabled me to switch between engineering and business frameworks when solving problems at work. It also helped me to view things through different lenses, which has made my work life a lot more fun and meaningful.

One of the best experiences I have had in USP is the inter-mixing of different disciplines. It was not uncommon to discuss something like bioethics over breakfast [at the college dining hall] with friends studying Economics, Linguistics, or Business. I even had a chance to discuss with a USP faculty member whose training is in a mix of history, arts and sociology, Associate Professor Ryan, on her take on my engineering design project. I saw my friend apply rhetorical techniques from the USP foundation tier module – Writing and Critical Thinking – to a marketing project, while I bounced off ideas on a nation-wide electric car network with someone taking classes on urban planning at the Lee Kuan Yew School of Public Policy.

I represented USP [International Programmes] at the Princeton Interactive Crisis Simulation Conference in Princeton University and sought to bring an engineer’s perspective to international relations. My talk on carbon emissions and STEM education became valuable to the cabinet I belonged to. It was honestly eye-opening how valuable each perspective could be, and how we could miss some of the most precious insights being pigeon-holed by our background. This inter-mingling of ideas and perspectives is truly unique to USP and was defining to my university education.

Varun Saini
Engineering Science + USP, Class of 2016
Software Sales Specialist, IBM Singapore

The Writing and Critical Thinking (WCT) class at USP was the most impactful in my USP experience as it introduced me to the rigour of deep reading, to the analysis of the ideas behind texts, and to the importance of making a clear argument. It sharpened my thinking and ability to read and write more critically, early in my education.

I joined the NUS Department of Architecture in 2011 as an Assistant Professor and am part of the History, Theory and Criticism cluster. Over the years, I developed my teaching module, “Southeast Asian Architecture”, based on my experience with USP classes. I encourage students to adopt a more rigorous and critical approach to the things they observe or can learn from on their own. I’m glad to have received positive feedback for inspiring students to think in this way.

Dr Imran Bin Tajudeen
Architecture + USP, Class of 2002
Assistant Professor, Department of Architecture, National University of Singapore

The Writing and Critical Thinking (WCT) class at USP was the most impactful in my USP experience as it introduced me to the rigour of deep reading, to the analysis of the ideas behind texts, and to the importance of making a clear argument. It sharpened my thinking and ability to read and write more critically, early in my education.

I joined the NUS Department of Architecture in 2011 as an Assistant Professor and am part of the History, Theory and Criticism cluster. Over the years, I developed my teaching module, “Southeast Asian Architecture”, based on my experience with USP classes. I encourage students to adopt a more rigorous and critical approach to the things they observe or can learn from on their own. I’m glad to have received positive feedback for inspiring students to think in this way.

Dr Imran was awarded the JOSI Most Promising New Civil Society Advocate in Singapore Award 2013 for his work with the Singapore Advocacy Awards for raising awareness on issues such as Muslim heritage and inclusive representation in Singapore.

Career Services

Our USP Career Services is a satellite career unit that supports our students in their career needs. At every stage of their career preparation in USP, from when they first enter as freshmen to their graduation as they transit into working life, we are committed to support the students to become career-ready by offering a range of services. Big things come in small packages. This is how we do it:

Career Planning
Recognising the importance of early career planning, we help students to discover their career inclination which is aligned with their life purpose, passion and competencies. This includes self-awareness of students’ personality profile, discovery of career interest and alignment with their values which will provide a direction for their career planning.

Career Exploration
To support students in their career exploration (be it the private sector, public sector, non-governmental or non-profit organisations, or be an entrepreneur), we collaborate with industry partners to offer internship opportunities. We also partner with USP alumni to guide students through a mentorship programme.

Career Preparation
We equip students with the relevant competencies in their career preparation by providing a range of services such as career discovery workshop, resume writing workshop, interviewing skills workshop, case interview workshop and assessment centre.

Postgraduate Education
For students who wish to pursue postgraduate studies, our professors provide advice to guide them in their decision-making. We also collaborate with other universities to conduct postgraduate education talks.

USP is committed to supporting students at every stage of their career process, right from their very first year.
We welcome about 200 of the most curious and brightest minds to join us each year.

If you are a prospective student wishing to apply to us, please submit your USP application at the same time as your NUS application. Each application is processed separately.

USP application is done via the USP Online Application Form. Please go to usp.sg/admissions where you will be guided on how to complete and submit your application. We will consider you based on your academic potential, essay, personal statement and an interview.
