Big things come in small packages

Explore what USP has to offer within the wider NUS

The National University of Singapore (NUS) is a big place with boundless opportunities and lots of room for exploration. It is truly a wondrous place to be. Imagine immersing yourself in a close-knit community within the wider NUS – joining an intimate group of open-minded individuals who share a passion to do amazing things, who celebrate diversity of thought, and who are always curious about learning and exploring interconnections. These individuals encourage one another to present different opinions and perspectives on just about anything, inside and outside the classroom. The University Scholars Programme (USP) is that community.

At USP, we welcome about 200 undergraduates each year, from seven different faculties in NUS. We provide them with an integrated academic and residential college environment within the NUS University Town. Being small means that every voice is heard, every interaction is meaningful, learning is active and rigorous, and pursuit of ideas is endless. Our students initiate and do numerous things locally and overseas from their first year to their fourth year. They are excited about the interweaving of ideas, and in this excitement, they are strongly supported by professors, staff and alumni.

We are small, but our aim is big: Shaping independent, adaptable thinkers and doers who will make an impact in the world.

Joining USP means joining a community that is curious, critical, courageous and engaged.

Find out about our innovative curriculum, diverse global opportunities, and transformative learning environment in the following pages.

Go to usp.sg for more details and updates of exciting programmes and developments in our community.

We are adventurous in thought. We pursue a broad range of intellectual interests and are ready to make connections across different domains.

We are willing to consider differing points of view, unafraid to face challenges and to act upon ideas.

We are intellectually rigorous, deeply reflective and value a humility born of awareness of the limitations of our own knowledge.

We extend the frontiers of knowledge in energetic and creative ways, and are prepared to navigate and help shape a complex world in a responsible way.
USP Curriculum

We offer a broad-based curriculum that balances both breadth and depth to give students an interdisciplinary education. Interdisciplinary means more than simply taking modules in different areas of study; an interdisciplinary education fundamentally changes how we perceive, think about, and understand the world. By examining a subject with knowledge and methods from multiple disciplines, such an approach produces new possibilities for innovation and creation.

Students admitted to USP are concurrently enrolled in 1 of 7 NUS faculties or schools:

- Faculty of Arts and Social Sciences
- Faculty of Engineering
- Faculty of Law
- Faculty of Science
- NUS Business School
- School of Computing
- School of Design and Environment

The average student to faculty ratio in the USP classroom is 15:1.

Learning in USP takes place in small classes that rely on strong interpersonal interaction and vigorous discussions. In this environment, all students are encouraged to share their perspectives and thoughts, and to learn through questioning their own assumptions and exposing themselves to new and competing ideas.

My major and USP: 70% + 30%

USP students earn 70% of their academic credits in their home faculty, and 30% in USP. The total workload is the same as that of other NUS undergraduates.
A USP student reads 12 USP modules in four years, and these modules are taken in three structured tiers, namely Foundation Tier, Inquiry Tier, and Reflection Tier. Each USP module is carefully designed to be truly interdisciplinary. Classes in USP are small and intimate, and our students get to choose from a wide range of modules.

**Foundation Tier**
- Writing and Critical Thinking
- Apocalyptic Cultures
- Civic Discourse in a Fractious World
- Clothing, Identity
- Colonialism and Cosmopolitanism
- Conditions of Happiness

**Inquiry Tier**
- Humanities and Social Sciences
  - Arts of Memory: Public Recollection & Memory
  - Engaging and Building Communities
  - Ethics and the Environment
  - From Lab to Stage: Writing the Science Play
  - Language, Cognition and Culture
  - Managing Cultural Difference: Theorizing the 5th Sense Model
  - Multiculturalism in Singapore and Its Contested Meanings
  - Nationalism and the Arts
  - Representing War
  - Singapore: The Making of a Nation
  - Singaporean Nostalgia
  - The Heterogeneous Indians of Contemporary Singapore
  - The Problematic Concept of "Candy"
  - Theatre and the World
  - Transitional Justice and War Crime Trials: Case Studies from Singapore and Asia
  - Virtue and Leadership
  - Welcome to the Anthropocene: Agency in the Era of Climate Change

**Reflection Tier**
- Intellectual Responsibility in a Complex World
- Human Trafficking and Modern Slavery
- Issues in and Around Justice
- Multidisciplinary Perspectives on "What?"
- Narrative in Everyday Life
- Technologies of Home
- Pursuit of Happiness
- Quantifying Environmental Quality
- Quantifying Nuclear Risk
- Quantifying Our Eco-Footprint
The first tier consists of three Foundation modules that emphasize critical thinking, close reading and engagement with texts, quantitative reasoning, and a contextual understanding of the major ideas and questions in the Arts and the Sciences. The goal of Foundation modules is to encourage students to challenge assumptions and ask critical questions across disciplines.

The three Foundation modules are conceptualized by dedicated USP professors, as follows:

**Writing and Critical Thinking**
This helps students to read and think critically, to engage with texts rather than simply repeating them, and to write persuasively. Each module is organized around a series of fascinating questions that students will investigate from a variety of disciplinary perspectives.

**Quantitative Reasoning Foundation**
Students gain an appreciation that, for many questions or issues, a quantitative analysis can provide insight and clarity that complement and go beyond what might be gained through a qualitative approach.

**University Scholars Seminar**
Spanning two semesters, students learn to situate the major ideas, thinkers and paradigm shifts in the history of intellectual inquiry. We survey the different attempts at addressing key questions in the pursuit of intellectual thought.

Apocalyptic themes dominate contemporary expressions of popular culture, revealing highly imaginative and frightening ways that the end of the world might come about as well as the many scenarios of the life beyond. But our fascination with these themes tell us that they are influential not because they are works of fiction but they have something important to say about our political and social realities. How then do apocalyptic cultures mirror changing historical anxieties over the different agents of destruction and the people who have access to them? What do they reveal about consumers especially in a transnational context? For example, how does apocalyptic cinema from the US become transplanted in a place like Singapore?

Through looking at the themes and objectives of apocalyptic cultures, the teaching professor for this module aims to achieve the larger purpose of fostering intellectual consciousness among students so that they can ask important and significant questions, construct responses to those questions, and ultimately express them in the written form.
### Inquiry Tier

The second tier consists of eight Inquiry modules in either the Humanities and Social Sciences domain or the Sciences and Technologies domain. Students will read modules distributed evenly between the two domains, for a broad intellectual and disciplinary base. The overall goal of the second tier is to deepen students’ understanding of intellectual connections outside of their disciplinary specialisations by way of multidisciplinary inquiry. To create an environment of educational intimacy and collaborative discovery, Inquiry modules take place in small seminars to facilitate meaningful dialogue.

#### In the Humanities and Social Sciences domain
- **UCV2209** The Heterogeneous Indians of Contemporary Singapore
- **UBM2201** Hormesis and Life

#### In the Sciences and Technologies domain

<table>
<thead>
<tr>
<th>In the Humanities and Social Sciences domain</th>
<th>In the Sciences and Technologies domain</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>What makes an Indian, and just how heterogeneous is the Indian community in Singapore?</strong></td>
<td><strong>“What doesn’t kill you makes you stronger”, is a popularised saying that instills optimism and courage. But is there any scientific basis that undergird this principle? And if so, how far can we push this idea?</strong></td>
</tr>
<tr>
<td>This module provides for a multifaceted understanding of the heterogeneous Indian community in contemporary Singapore. The reality and elasticity of an Indian cultural mosaic, which is influenced and exemplified by colonial and post-colonial history, migratory patterns, geographical proximity to India, Singapore-India foreign relations, centrality of religion, localised food culture, diverse traditions and rituals, differing languages, varieties of occupations, and myriad of organisations and networks, among others, underpins and personifies the essence of multicultural identity in Singapore. The teaching professor will combine theory and empirics in studying and discussing these various issues. Field trips, sampling of food alongside the observance of rituals, and dialogues with policymakers and stakeholders are the principal highlights of this module.</td>
<td>“Hormesis” is the scientific term that captures the essence of these rhetorics. This module characterises hormesis and addresses the biological mechanisms behind it using classical examples of stresses that are capable of evoking both a good and a bad response. For example, why does mechanical stress break a bone and strengthen another? Why does a bug infect one individual but immunise another? Based on this exposition of the concept, the teaching professor hopes to generate a platform for an intellectual discourse and deep dialogue on the potential analogies across domains even as far-flung as sociology and psychology. Ultimately, he aims to create a new perspective to stress, and to challenge students to consider the merits of managing stress rather than avoiding it.</td>
</tr>
</tbody>
</table>

---

The Humanities and Social Sciences domain covers Literary Studies, Visual and Performing Arts, Philosophical Inquiries, Human Behaviour, Society, Economy and Polity, and Civilisational Studies.

The Sciences and Technologies domain covers Life Sciences, Nature’s Laws, Quantitative Reasoning, Biological and Medical Technologies, Physical and Chemical Technologies, and Information Technologies.
Reflection Tier

This third tier consists of a single module, the Senior Seminar. It is designed to bring students together towards the end of their degree to reflect on the conditions of their own disciplinary knowledge and the assumptions developed in disciplinary training, and to cultivate a broader interdisciplinary framework to approach discourse and ideas with.

This module prepares students for intellectual life beyond the university by asking them to reflect on how their undergraduate education can be brought to bear on the complex political, social, economic, and existential problems of the “wider world” they will be confronting and participating in upon graduation. As a capstone of the USP education, this module builds on the entirety of USP’s curricular and co-curricular experiences by getting students to consciously make connections among these experiences.

Whether these connections are across disciplines, learning activities, or academic and broader social concerns, the aim is for students to draw new and deeper insights into what they have learnt at university and how they can continue to do so beyond the training ground of the university.

USR4002A

Intellectual Responsibility in a Complex World

Collection of the most recent ePortfolios done by USP students for this module.
USP International Programmes are designed to give students the opportunity to explore interdisciplinary modes of thinking and understanding beyond the conventional classroom setting in Singapore, and relate and translate their learning to the wider world. From their first year in USP, students are encouraged to become active participants in the experience, whether by proposing and organising international programmes, or by demonstrating leadership skills and resourcefulness throughout.

In doing so, we hope to foster an environment wherein students, with support from professors and administrative staff, initiate and take ownership of endeavours for their personal and professional development.

- **USP Student Exchange Programmes (SEP)**
- Joint Degree Programmes, Double Degree Programmes
- Short-Term Programmes: Study Programmes, Conferences, Module Study Trips

USP International Programmes

United States of America

International Programmes
Joint Degree Programmes, Double Degree Programmes

Joint Degree Programmes
- NUS-Australian National University, Australia

Double Degree Programmes
- NUS-Sciences Po, France
- NUS-Waseda University, Japan

Short-Term Programmes

Study Programmes
- Buddhism-in-Asia, various countries
- Builders Connect, Philippines
- Civilization of Iran, Iran
- Comparative Cultural Rhetoric Academy, France
- Forgotten Communities, Malaysia
- Inter-Civilisational Dialogue, Turkey
- Internship Exchange with SP Jain Institute of Management & Research, India
- Study Trip for Engagement and Enrichment (STEER), various countries
- U21 Social Entrepreneur Corps, Ecuador

Conferences
- Asian Undergraduate Summit, various countries
- AUN and ASEAN+3 Education Forum & Young Speakers’ Contest, various countries
- Clinton Malaria, Young Stais, Writers Conference, USA
- G20 Japan Leaders’ Forum, Japan
- Pan-Asian Student Forum, various countries (Seoul, Beijing, Hong Kong, Tokyo)
- Promotion Diplomatic Invitation, USA
- Tufts University ERIE International Symposium, USA

Module Study Trips
- Participating Social Development in Southeast Asia, Thailand
- State-Anthropologies in Southeast Asia, Laos and Thailand
- Theatre and the World, Indonesia
Asian Undergraduate Summit

*USP’s student-centric culture has empowered me to head projects like the Asian Undergraduate Summit. Being the Chairperson of this regional venture has imparted invaluable skills such as effective communication, team coordination and stakeholder management just to name a few. The lessons learnt from this project go well beyond my classroom, equipping me for life after university.*

Raag Sudha Sanjay
Political Science + USP

Civilisation of Iran

*The most impactful part of the trip was being able to engage and interact with our counterparts from the University of Tehran. The engaging discussions on Multiculturalism in both Iran and Singapore made for a rewarding experience.*

Muhammad Sujairi B Maulod
Mechanical Engineering + USP

Forgotten Communities

*It’s a challenge to interact with the local people given the language barrier. I had to get out of my comfort zone and be very open to new ideas and beliefs, feelings, and emotions. It’s amazing how quickly we bonded with everyone, including the UTAR students and staff.*

S Sivapriya
History + USP

Builders Connect

*Learning first hand from the management team as well as the individuals who benefited from these NGOs made learning more interactive and applicable to daily life.*

Tan Jing Yi
Mechanical Engineering + USP

Student Exchange Programmes

*My stint in Turkey has made me appreciate and embrace cultures I’d never ever imagined being immersed in. Through my exchange at Boğaziçi University, I found genuine empathy, and openness for people as people.*

Khng Lanyuan Desiree
English Literature + USP

International Programmes

International Programmes

Joint Degree Programmes with the ANU

*People at the ANU are really easy to work with and you can call your professors by their first name. Everyone is at the same level. It’s how willing one is to ask questions and propose ideas.*

Matthias Wong Meng Yan
History + USP

USP offers joint degree programmes (JDPs) with the Australian National University (ANU) – one for USP students in the Faculty of Science, and the other for those in the Faculty of Arts and Social Sciences. USP students spend three semesters in the ANU, then return to USP to complete the remaining semesters. Students who complete JDPs at the ANU gain access to a range of disciplinary fields, flexible degree structures, and the diverse cultures that make up ANU's community. USP hosts ANU students when they are in NUS.
College and Community

Cinnamon College (USP) is no ordinary campus residence. It is where USP students forge exciting possibilities and create precious memories.

Our college is located in NUS University Town. Within this unique space, students develop a sense of belonging through living and learning together, making full use of the facilities and resources. They take classes at the learn labs adjacent to the college block, they share meals with peers, professors and alumni, they participate in sports and hold events in the hall, and they have numerous thoughtful discussions, both formal and informal, in the Master’s Commons, floor lounges, suites and our common lounge – fondly known as Chatterbox.

"When I think USP, I think Home. It’s hard to pinpoint what makes me gravitate towards USP, but perhaps it is the warmth of the community that lies at the heart of USP. That treasure trove of warm memories that we share in Cinnamon College, the late night study sessions, the mind-blowing Avalon games, the heart to heart talks through the night, the impassioned intellectual discussions and that occasional surprise gift at our door. If NUS is the body of my University life, USP is my heart and soul." - Jeremy Jee (Computer Science + USP)

Our college serves 2 meals a day (breakfast and dinner; 6 days in a week) where students and professors catch up, share meals and have thoughtful discussions.

2 Years of residential living: 21 floors with 600 rooms consisting of freshmen, seniors, professors and international students giving them the freedom and flexibility to build unique experiences.

20 floors with 400 rooms: 2nd year and optional year of choice (with the option to extend beyond)
Our community is close-knit, socially engaged, highly intellectual and a lot of fun! We are a community of students, professors, staff and alumni of diverse backgrounds, disciplines and interests. Our students also belong to and are represented by the University Scholars Club (USC). Befitting the student community in academic and social welfare matters, USC actively seeks to empower students to lead impactful projects and stimulate critical discussions in the community.

Both residential and non-residential students initiate and participate in an extensive range of intellectual, community engagement, and social programmes and projects.

### Brainfood+
A not-for-credit chance to learn, Brainfood+ provides a fun dimension for students to explore beyond formal learning interests. Led by volunteer USP professors, small groups of students meet weekly to tackle a central question, using a book to drive inquiry forward.

### USPolymath
USPolymath is a student interest group that invites speakers to share compelling ideas with the wider USP community using the Pecha Kucha format – 20 slides for 20 seconds each. Previous sessions have spanned a wide range of topics that reflect the diverse disciplines and interests in USP, from the principles of gravity to the defense of feminism in Singapore.

### The Sessions
The Sessions ignites student-led discussions within and beyond the USP community by serving as a platform to host interesting guests who enrich conversations on various topics. Students select topics and guests based on community suggestions and plan for a range of discussion formats beyond conventional dialogues.

### USP Productions
Active since 2006, USP Productions is a platform for students to showcase their theatrical talents and skills in annual productions. Committed to the development and production of quality student-driven theatre, USP Productions explores issues deeply relevant to Singaporean society at large.

### Connect Tuition
A pro-bono mentoring and tuition programme initiated in 2014, Connect Tuition pairs more than 140 USP students with underprivileged children aged 8 to 16 years living in the Casa Clementi and Dover housing estates. With a mission to foster community ties, support positive youth development and provide conducive learning environments for the mentees, more than 200 children have benefitted.

### We Will Dance
We Will Dance is Singapore’s first 10-hour charity dance marathon that was organised in 2013 by USP alumni. To date, USP students have attracted over 1,000 participants and raised over $50,000 for charitable institutions focused on education. We Will Dance brings together its beneficiaries to groove with its participants to the beats of K-pop, zumba and hip hop.
Adjusting to a new environment in university can be daunting. Different parts of the USP community come together to support each other through this transition and across the undergraduate experience.

From formal advising avenues to ground-up initiatives, help is always available in USP – empowering everyone to have the best experience they can.

Academic Support

Senior USP students act as Peer Mentors, providing personalised academic guidance to freshmen. Freshmen are also assigned professors as Academic Advisors.

At the Writing and Quantitative Reasoning Centres, experienced senior students assist their peers with their assignments.

Social and Psychological Support

USP students belong to one of six Houses, which act as welfare and support networks connecting them across batches.

First-line Counselling Care and Support is available to all USP students.

Student Interest Groups

• Love, USP advocates for mental health awareness within the USP community
• Gender Collective is an inclusive and safe space to discuss issues relating to privilege and marginalised groups

Residential Support

Designated Freshmen Floors help freshmen build support networks with peers going through similar experiences.

Each neighbourhood of 3 floors is cared for by 1 Residential Professor and 3 student Residential Assistants.

Financial Support

Bursaries and Grants

• U-Town Bursaries and USP Grants help financially challenged students defray the cost of staying in our college.

Scholarships

• U-Town Scholarships and USP Scholarships are available for outstanding students.
I enrolled in NUS with the intention of learning what it takes to earn my keep in Science (bread and butter), but got so much more in the process. USP offered “teasers” from other faculties and disciplines which included modules on writing, business, civilisation, engineering, chemistry and physics. I will always remember how we deconstructed consumerism and constructed gadgets in the classes. As a science student, I had the chance to build a Tesla coil (unsuccessfully and shorted the circuit to the engineering lab!). USP allowed for interaction with students from other faculties – it increased my exposure to ideas as people have different ways of solving the same problem. These experiences shaped my love for learning.

I learnt through USP the many skills that complement research; this helps a lot in my current work on breast cancer. Suffice it to say, I would be a different person if not for my time at NUS and USP.

Dr Li Jingmei
Life Sciences + USP, Class of 2006
Senior Research Scientist at the Genome Institute of Singapore, A*STAR

I am from the pioneer batch of Law + USP students. My USP experience has greatly enhanced how I work and function as a lawyer. Learning how to engage in conversation and listen purposefully through years of discussions in various forums in USP (online, in classrooms, in lifts or the college dining hall) has shaped how I interact with my colleagues and my clients. Part of being a lawyer is being able to advise on how best to proceed taking in mind clients’ interests; understanding these interests and getting clients to understand the way forward has been challenging but manageable thanks to my USP experience.

What’s also important to me is the rich support system and community at USP. I met some of my closest friends in USP, and the constant emotional support and intellectual re-firing have continued beyond our undergraduate days.

Apart from reading Law and being a part of USP, I was also active with the NUS Jazz Band and sang at gigs as a freelancer. Time management is really important. You can make the most of limited time by knowing what is important to you and what to spend it on.

Tong Miin
Law + USP, Class of 2016
Legal Associate, Lee & Lee

My experience in USP is akin to taking intellectual dips in various pools of knowledge – from the logic underlying mathematics to the history of Islam across societies somehow helping my mind interconnecting these issues in different angles, and be comfortable to read across disciplines in order to solve problems. For example, in Chapter W, the problem that we are trying to solve is not just the problem that villages have no light. This issue is intricately tied with the issue of rural supply chain, engineering quality of products, the gender dimension in poverty, the role of economic incentives in our programmes, and the formal and informal structures of power in rural societies.

Fairoz was honoured with the prestigious NUS Outstanding Young Alumni Award 2017 for his outstanding achievements and leadership in community service. He founded Chapter W, a non-profit social enterprise that provides innovative, suitable and sustainable solutions to help and empower the poor in Indonesia. Currently, he is pursuing a Master of Public Policy at Blavatnik School of Government, University of Oxford on a Chevening-Oxford scholarship.

Mohamed Fairoz Bin Ahmad
Sociology + USP, Class of 2006
Founder and Executive Director, Chapter W

Alumni

We value our alumni tremendously. They do wonderful things in so many fields and sectors, and continue to do things with USP. They return to mentor students, help interview applicants to USP, share their experiences of life after university, and collaborate with students on special projects.

They tell us that they do so because of their USP experience.

Read the USP experience of seven alumni here, and learn more about other alumni at usp.sg.

Alumni 27
26
Shaun Lin  
Executive Director, UBS Wealth Business + USP, Class of 2004 
Alumni  
My journey through USP taught me to amass large amounts of information across diverse subjects effectively and to draw connections between different disciplines that may not be obvious otherwise. While Business was my main course of study, through USP I was able to focus on a great number of engineering, aerospace and life sciences courses. Cross-disciplining training between business and engineering has enabled me to switch between engineering and business framework in which some problems at work. Being able to see practical solutions to many of the problems I face in the real world. My USP education also gave me the ability to think outside the box and to see solutions from different perspectives.

I remember an interesting encounter I had with a client that I was not just an expert in my field, but also knowledgeable in his. The client had a keen interest in quantum computing, and I was able to discuss the connections between different disciplines that may not be obvious. I was able to explain the principles of quantum computing to him from an engineering perspective, and he was able to understand them and appreciate them. This helped in my negotiations and dealings with my team at work.

In my work, I often need to understand the different cultural nuances when I interact with people from different backgrounds. I use the concepts of USP classes such as Dr. Ryan's lecture on "Southeast Asian Architecture" and his discussion with a USP faculty member whose training is in a mix of history, arts and sociology, to understand how different cultures and societies operate. My time at USP has sharpened my ability to think critically and to understand the world beyond the technical.

One of the best experiences I have had in USP is the inter-mingling of different disciplines. It was not unusual to discuss things like bioterrorism over breakfast at the college dining hall with friends studying different fields. It开阔我的视野，使我能从不同角度看问题。

I have been involved in various business initiatives and programs through USP. I have been part of a startup that has been featured in an IMDA story and interviewed developers and designers. I have been part of various projects and initiatives that have helped me gain exposure and experience in the startup ecosystem.

I am currently working as a consultant in the United States. I represent USP International at the Princeton Interactive Crisis Simulation Conference in Princeton University on the role of international businesses in supporting the need for such projects. I encourage students to adopt a more rigorous and critical approach to their work and to be open to different perspectives.
Career Services

Our USP Career Services is a satellite career unit that supports our students in their career needs. At every stage of their career preparation in USP, from when they first enter as freshmen to their graduation as they transit into working life, we are committed to support the students to become career-ready by offering a range of services. Big things come in small packages. This is how we do it:

Career Planning
Recognising the importance of early career planning, we help students to discover their career inclination which is aligned with their life purpose, passion and competencies. This includes self-awareness of students’ personality profile, discovery of career interest and alignment with their values which will provide a direction for their career planning.

Career Exploration
To support students in their career exploration (be it the private sector, public sector, non-governmental or non-profit organisations, or be an entrepreneur), we collaborate with industry partners to offer internship opportunities. We also partner with USP alumni to guide students through a mentorship programme.

Career Preparation
We equip students with the relevant competencies in their career preparation by providing a range of services such as career discovery workshop, resume writing workshop, interviewing skills workshop, case interview workshop and assessment centre.

Postgraduate Education
For students who wish to pursue postgraduate studies, our professors provide advice to guide them in their decision-making. We also collaborate with other universities to conduct postgraduate education talk.

USP is committed to supporting students at every stage of their career process, right from their very first year.
Application

We welcome about 200 of the most curious and brightest minds to join us each year.

If you are a prospective student wishing to apply to us, please submit your USP application* at the same time as your NUS application. Each application is processed separately.

USP application is done via the USP Online Application Form. Please go to usp.sg/admissions where you will be guided on how to complete and submit your application. We will consider you based on your academic potential, essay, personal statement and an interview.
